LEANDERSON MONTEIRO

Software Engineer

Bachelor of computer science

About

Hello everyone.

My name is Leanderson Monteiro, I'm is passionate for the technology world, I started my journey on my bachelor of computer science in January 2010 and finished this course in december 2014.

More about me, I'm proactivity, sense of responsibility, I like to participate at the beginning of the project, since planning, architecture, development, delivery and maintenance, but I have already started working on several ongoing projects where I had easy adaptation. Solid knowledge in PHP, Javascript and OutSystems. Experience since 2010 in systems development, always seeking to improve my knowledge in search of news and quality in software development.

Hire me,

- 10st June, 1992
- +351 917 447 583
- leanderson@lmonteiroms.com
- Lisbon, Portugal

Skills

Languages the programmation and marcation
- PHP, CSS, ES6, HTML, NodJS, Javascript

Database
- MySQL, MsSQL, PgSQL, MongoDB, MariaDB

Framework/Libraries
- Laravel, Lumen, OutSystems, React, Angular, NodeJS, Codeigniter, Zend framework, CakePHP, jQuery, Bootstrap

Versioning
- GIT, SVN

API's
- Google, Facebook, Pagar.me, PagSeguro, Booking, AWS(S3), Stripe, Braintree

Methodology and Design Patterns
- Scrum, XP, RestFul, Agile

CMS
- Wordpress, Drupal, October

Tests
- PHPUnit, TDD

Experiences

OutSystems Architect

At Fidelidade (Outsourced by 5 Estações)
August 2021 - Present

My main responsibility is to ensure the development of actions to promote the technological platforms that support the development.

- **Define and control the platforms' best practices, through the use of regular audits, training of development teams, and governance mechanisms created for this purpose;**
- **Define, together with the Enterprise Architecture team, the foundations of digital architecture and core platforms;**
- **Implement transversal components of the platforms, fulfilling the architectural requirements that enable their use by applications/solutions within the scope of the Fidelidade Group;**
- **Ensure the evolution of platforms, ensuring the support of the respective suppliers;**
- **Ensure technical and functional integration with core business solutions;**
- **Evolve non-functional requirements, such as authentication and authorizations;**
- **Maintain and evolve the robustness testing tools of the distributed infrastructure, enhancing the rapid detection of anomalous situations, helping to diagnose errors;**
- **Manage, streamline and guarantee the data archiving of business applications, as well as the implementation and coordination of masking data from non-productive environments;**
- **Ensure support, preparation and coordination of meetings of committees and management bodies created within the scope of their responsibilities;**
- **Calculate, create and monitor the platforms' KPIs and suggest changes to ensure compliance with good practices through regular audits;**
- **Develop and maintain quality requirements and characteristics;**
- **Ensure the management of the technical parameters of the platforms within its scope of action;**
- **Maintain environments, according to the rules established together with the development, Enterprise Architecture, Quality Assurance and Infrastructure and Operations teams;**
- **Maintain and evolve the DevOps process ensuring its evolution and extension to the entire Architecture in full alignment with the Agile methodology, security and performance rules.**

OutSystems IT Consultant

At 5 Estações
August 2021 - Present

I'm work in 5 estações how outsourced in clients.

Technical Lead

At EDP (Outsourced by Novabase)
March 2021 - August 2021

Tech leader in some projects with this stack: PHP, RestFul, Angular 7/8, Git Flow, Jenkins, CI/CD, Unit tests, Agile Development, Scrum.

My responsabilities is :

- **Ensure the quality of all technical deliverables of its application.**
- **Apply the principles of software engineering to the design, development, maintenance, testing, and evaluation of software.**
- **Ensure that the application is designed and implemented taking into account the performance and SLAs required by business.**
- **Know the technical aspects of the application (Architecture, Infra, ...) as well as the functional and contextual aspects.**
- **Create the conditions to have the application in a Continuous Integration/Continuous Delivery (CI/CD) automated mode.**
- **Identify and maintain a clear backlog of the technical debt in order to help the Product Owner prioritize and decrease the overall product technical debt.**

- Lead the technical evolution of the application.
- Ensure that the application and the team follows the Security, Development, Architecture and Business Continuity guidelines and rules, includes security vulnerability resolution.
- Align with the Platform Expert and Solution Master to implement the guidelines and frameworks defined by EDP.
- Ensure that the correct documentation of the application, including all the CI of the application are registered and up-to-date in the CMDB (ServiceNow).
- Manage its application infra-structure cost and consumption.
- Identify the monitoring and alerts needed to manage the application while ensuring the application is monitored via Centro de Comando.
- Continue the development of the system in parallel with the team on some tasks.

Full stack Developer

At EDP (Outsourced by Novabase)
August 2019 - March 2021

Stack: PHP, RestFul, Angular 7/8, Git Flow, Jenkins, CI/CD, Unit tests, Agile Development, Scrum

Backend Developer

At EDP (Outsourced by Novabase)
March 2019 - July 2019

Stack: PHP, Rest, SOAP, Integrations, Git, Agile Development, Scrum

Senior Software Engineer

At Novabase
March 2019 - August 2021

I'm work in novabase how outsourced in clients.

Senior Software Engineer

At Doinn
December 2017 - March 2019

Stack: PHP, HTML, Javascript, JQuery, Laravel, MySQL, API RestFul, PHPUnit and integrations with others APIs

Pleno web developer

At Group Ser Educational
December 2016 - December 2017

Stack: Outsystems 9, PHP, Zend framework 1.X, MySQL, MsSQL, HTML, CSS, Javascript

Back-end developer

At Planedia
May 2015 - November 2016

Stack: PHP, Laravel 4.x / 5.x, MySQL, MongoDB, ElasticSearch, create API RestFul

Software Engineer

At BankSystems
May 2015 - November 2016

Stack: PHP, CakePHP, Drupal, PgSQL, MySQL

Junior Web Developer

At Group Ser Educational
July 2013 - September 2014

Stack: Outsystems, PHP, Zend framework 1.X, MySQL, MsSQL, HTML, CSS, Javascript

Web Developer

At Civis

March 2012 - June 2013

Stack: PHP, FacilMVP, CakePHP, MySQL, HTML, CSS, Javascript

Internship Web Developer

At Receita Federal do Brasil

October 2010 - March 2012

Stack: PHP, MySQL, HTML, CSS
